

From April 22 to 24, Datatex will be present at the AFA's FloorTek Expo.

April 22-24, 2003 Dalton Georgia USA
www.floor-tek.com

Since 1994, AFA's FloorTek Expo is the only international flooring manufacturing tradeshow dedicated to the production and materials of the industry.

Datatex at Hall 2 booth 2 45 will present and demonstrate **TIM - Textile Integrated Manufacturing**.

800-892-2350 to book a demo

TIM manages all phases of the carpet construction cycle including the manufacturing of different carpet types whether machine woven, tufted or bonded. Also, special processes such as melt bond are managed in detail by **TIM**.

Most ERP solutions fail to adapt to the uniqueness of carpet manufacturing. Carpet manufacturers end up creating custom solutions or modifying generic ERP systems to fit their supply chain management needs which is costly and difficult to maintain and support.

TIM is different. Datatex created the **Textile Integrated Manufacturing (TIM)** solution to specifically meet the needs of textile industries. The **datatex** references in the carpet industry include the most important manufacturers.
