

Visit datatex at hall E3 stand C13

Shanghai, China. 27-31 July 2008
www.itmaasia.com | www.citme.com.cn

The first "ITMA ASIA + CITME 2008" exhibition will be held in Shanghai New International Expo Centre China.

Scheduled to take place every two years, the 2008 edition contains 120000 sqm exhibition space, 1200 exhibitors and are expected 100000 trade visitors.

datatex and Chemtax will present and demonstrate:

Logistics

From order acceptance to shipping and invoicing, from inventory control to warehouse management, leveraging procurement with user-defined policies to optimize material availability.

Planning and Scheduling

Translating and optimizing demand into orders (production / purchasing) considering: material availability, work centre capacity, and external providers.

Meeting customer order delivery dates; maximizing the utilization of machines, labor, and tools while minimizing set-up times and materials or tools shortages.

Manufacturing

Production cycle management from raw materials to finished goods, including formula / recipe management, Work In Process (WIP), and quality control.

ADC - Automatic Data Collection

Sending queues and instructions to machine operator, capturing actual machine performance, production progress and movements of material.

Real-time fabric inspections. Dynamic methods and tools to optimize first quality products.

Cost control

Dynamic and detailed views of product and manufacturing costs – accumulated at either standard or actual levels.
